

## X-RAY INSPECTION FOR FOOD SAFETY AND QUALITY

*Need to improve your product quality inspection using X-Ray technology but do not want the hassle of consuming too much time for training and the high costs involved? Then **Mekitec – For Safe Food** ([www.mekitec.com](http://www.mekitec.com)) is your obvious choice. We have been in the market for more the 15 years.*

*Admittedly, any manufacture who puts food safety and quality as a **PRIORITY** will have their brand ratings improved significantly because they will gain the **TRUST** of the Consumer. It is this **TRUST** that consumers keep coming back while spreading their positive feedback of the product to others.*

*Hence, the manufacturer's good manufacturing practice where a big part of it concerns **FOOD SAFETY** and quality has helped the manufacturer to gain more market share and increase its sales.*

**Why the need for X-ray quality inspection?** Honestly but sadly, a **NEGATIVE** feedback on your product posted via **SOCIAL MEDIA** can **DESTROY** your brand or company in **SECONDS!!!** This is why X-Ray quality inspection is a **MUST** to safeguard and to protect the future of your brand, product and company. With Mekitec X-Ray inspection, maintaining safe and quality food products is simple, effective and automated, but without the high costs.

**BEST VALUE WITH MEKI X-RAY**

For your information, do you know that an X Ray machine is not just to inspect for contaminants? It can also detect missing components, out-of-dimension, unfilled bottles, cracked container, packing disarray and also works as a counter for counting the number of items in a sealed packing.

**Contact us!** Want to know more on X-ray inspection? Feel free to shoot us an email at [info@meritberg.com](mailto:info@meritberg.com) or drop us a line at +60163262899, or just Whats App us. We would gladly answer your enquiries.
